Dashboard

See today’s menu and a quick overview of your products.

Counts — Products on sale, hidden products, shop items and categories.

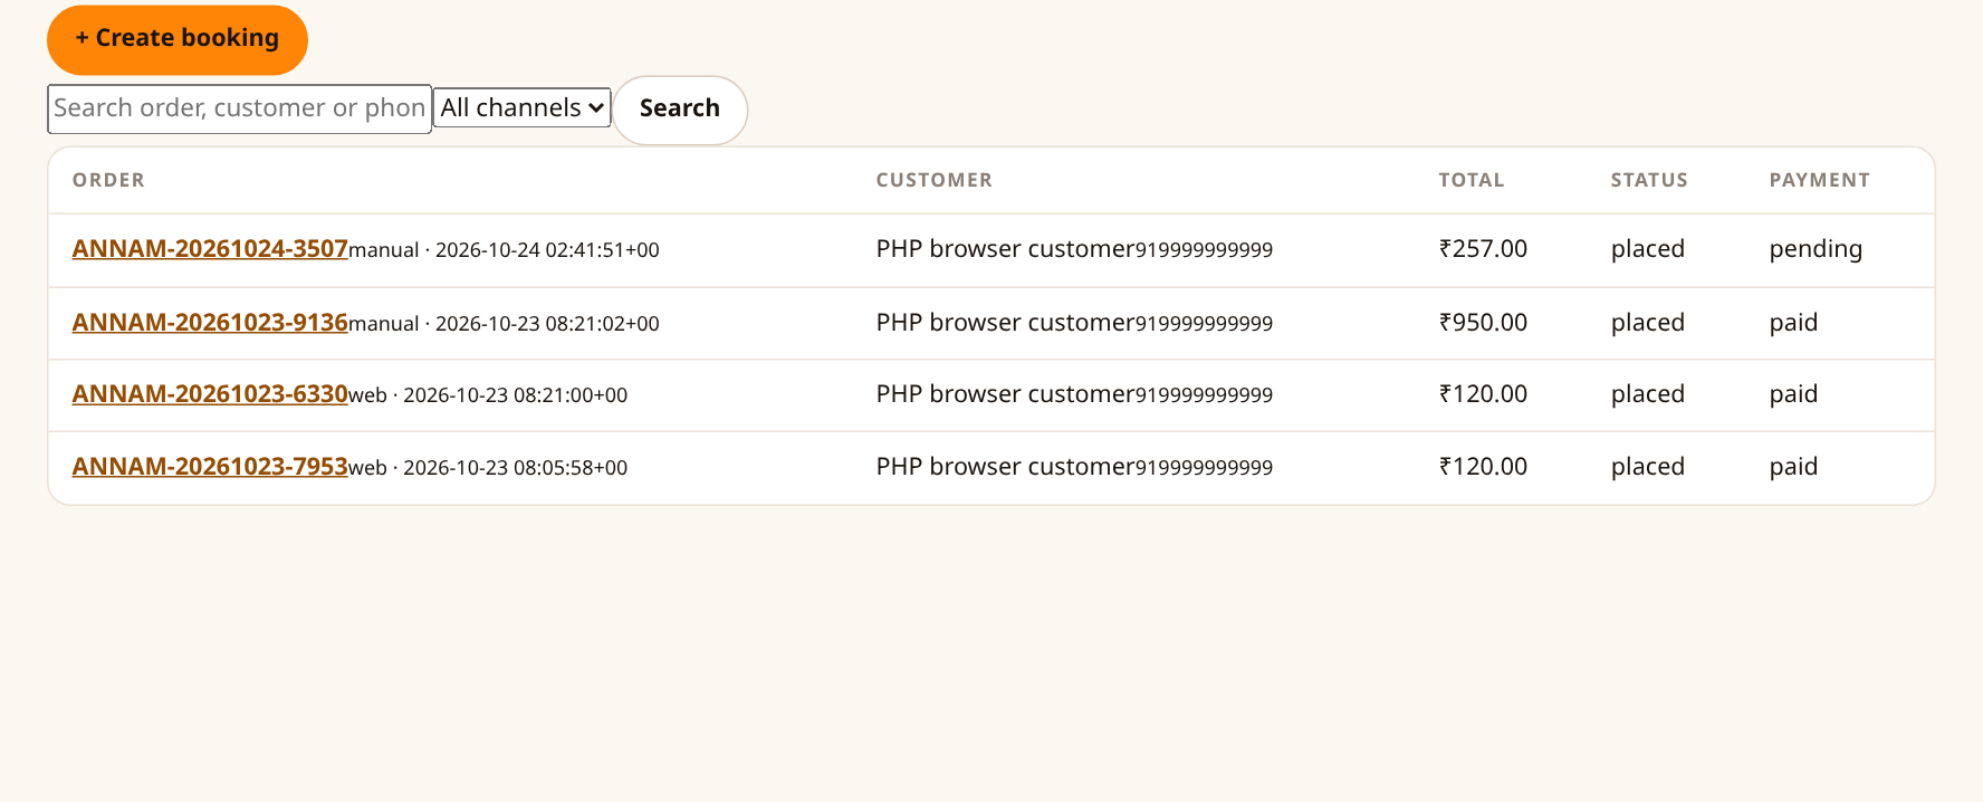

Today’s menu — The dishes listed for breakfast, lunch and dinner.

Choose dishes — Opens the screen for selecting a day’s menu.

Shortcuts — Quick links for adding dishes, offers and delivery areas.

Orders & billing

Find orders, check their progress and open bills.

Create booking — Enter a phone, counter or WhatsApp order.

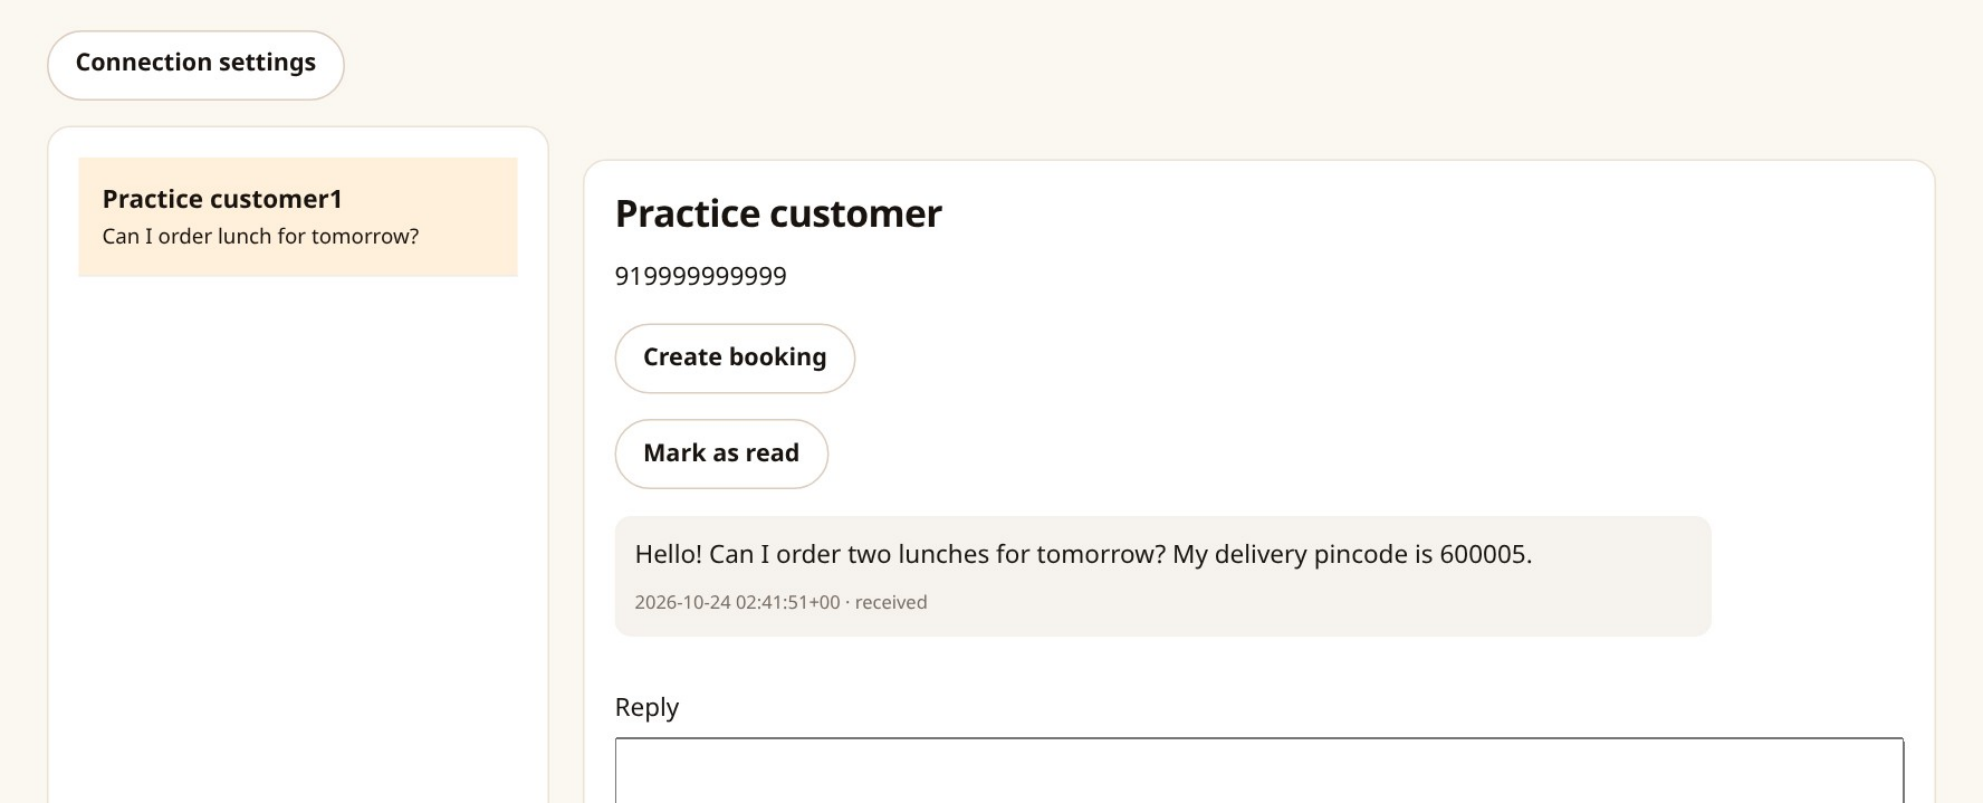

Order number — Opens the customer, address, items and payment details.

Status / Payment — Delivery progress and payment received are shown separately.

Bills — Open a paid order to view, print or save its bill.

WhatsApp inbox

Read customer messages and reply to conversations.

Conversation list — Choose the customer you want to speak with.

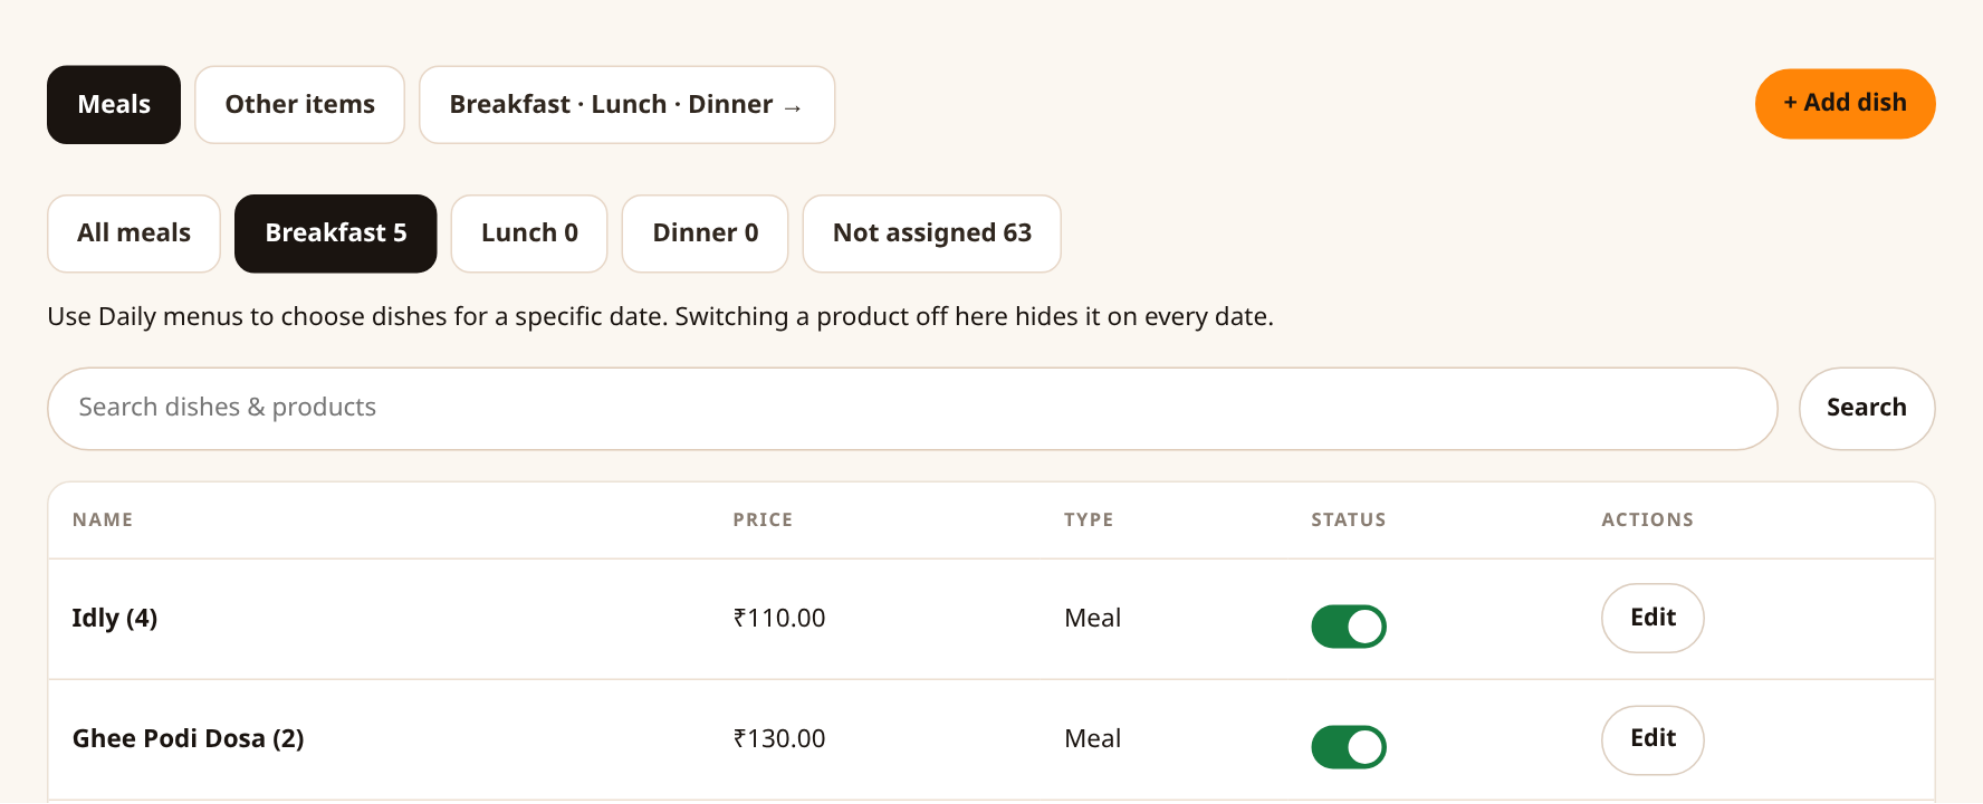

Messages — Read the customer’s request and the kitchen’s replies.

Reply — Type a response; normal replies need a customer message within 24 hours.

Create booking — Turn the customer’s request into an order.

Dishes & products

Manage the items you sell and their prices.

Meals / Other items — Cooked meals and packed shop products.

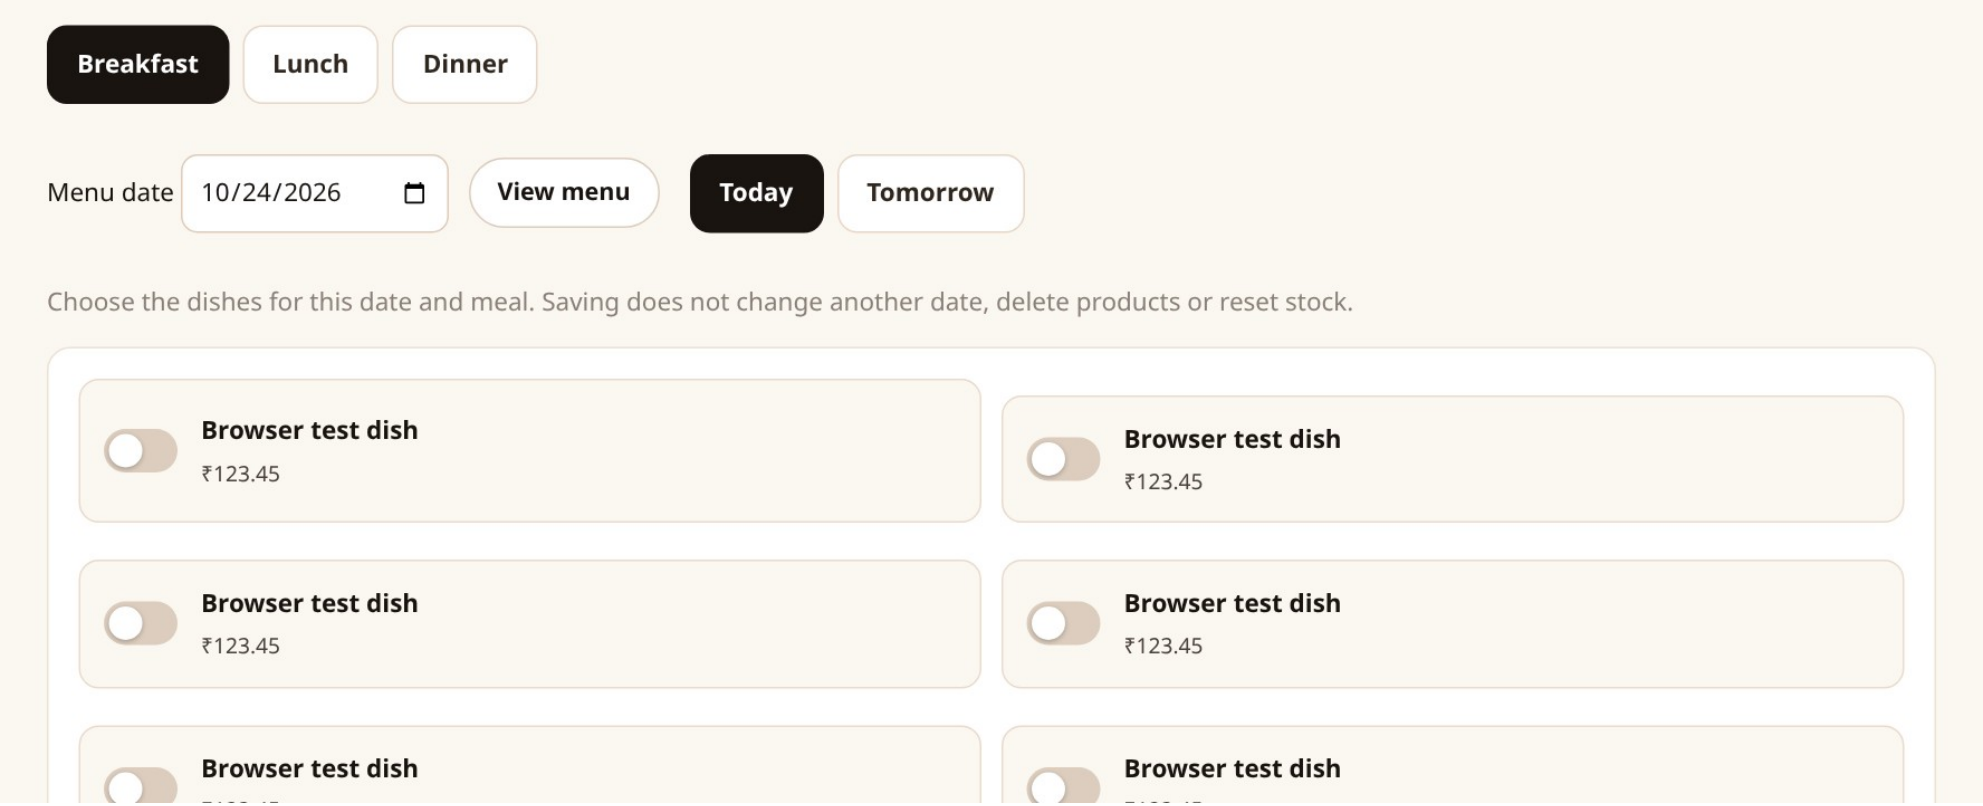

Add dish — Create a new item with its name, price and photo.

Edit — Change an existing item’s details.

On sale — Show or hide the product across all dates.

Daily menus

Choose which dishes are available for each meal and date.

Meal — Select breakfast, lunch or dinner.

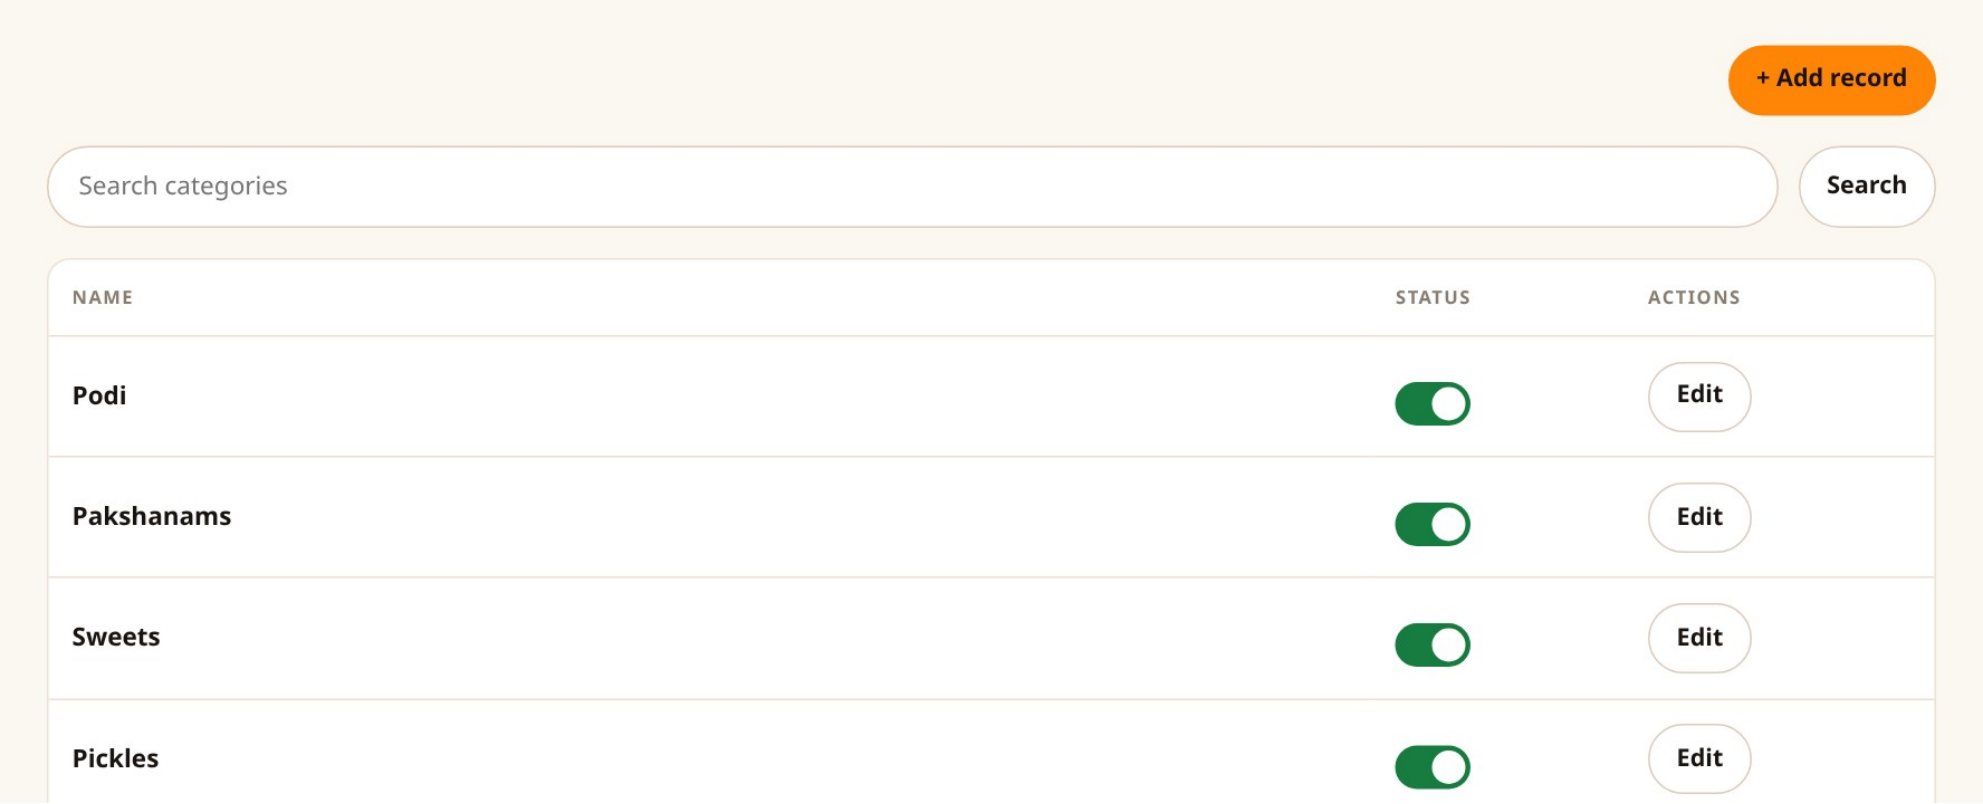

Date — Choose Today, Tomorrow or a date from the calendar.

Dish toggles — Turn on the dishes you want to serve that day.

Save menu — Saves only the selected date and meal.

Categories

Group similar products so they are easier to find.

Category — A group such as Podi, Pickles or Sweets.

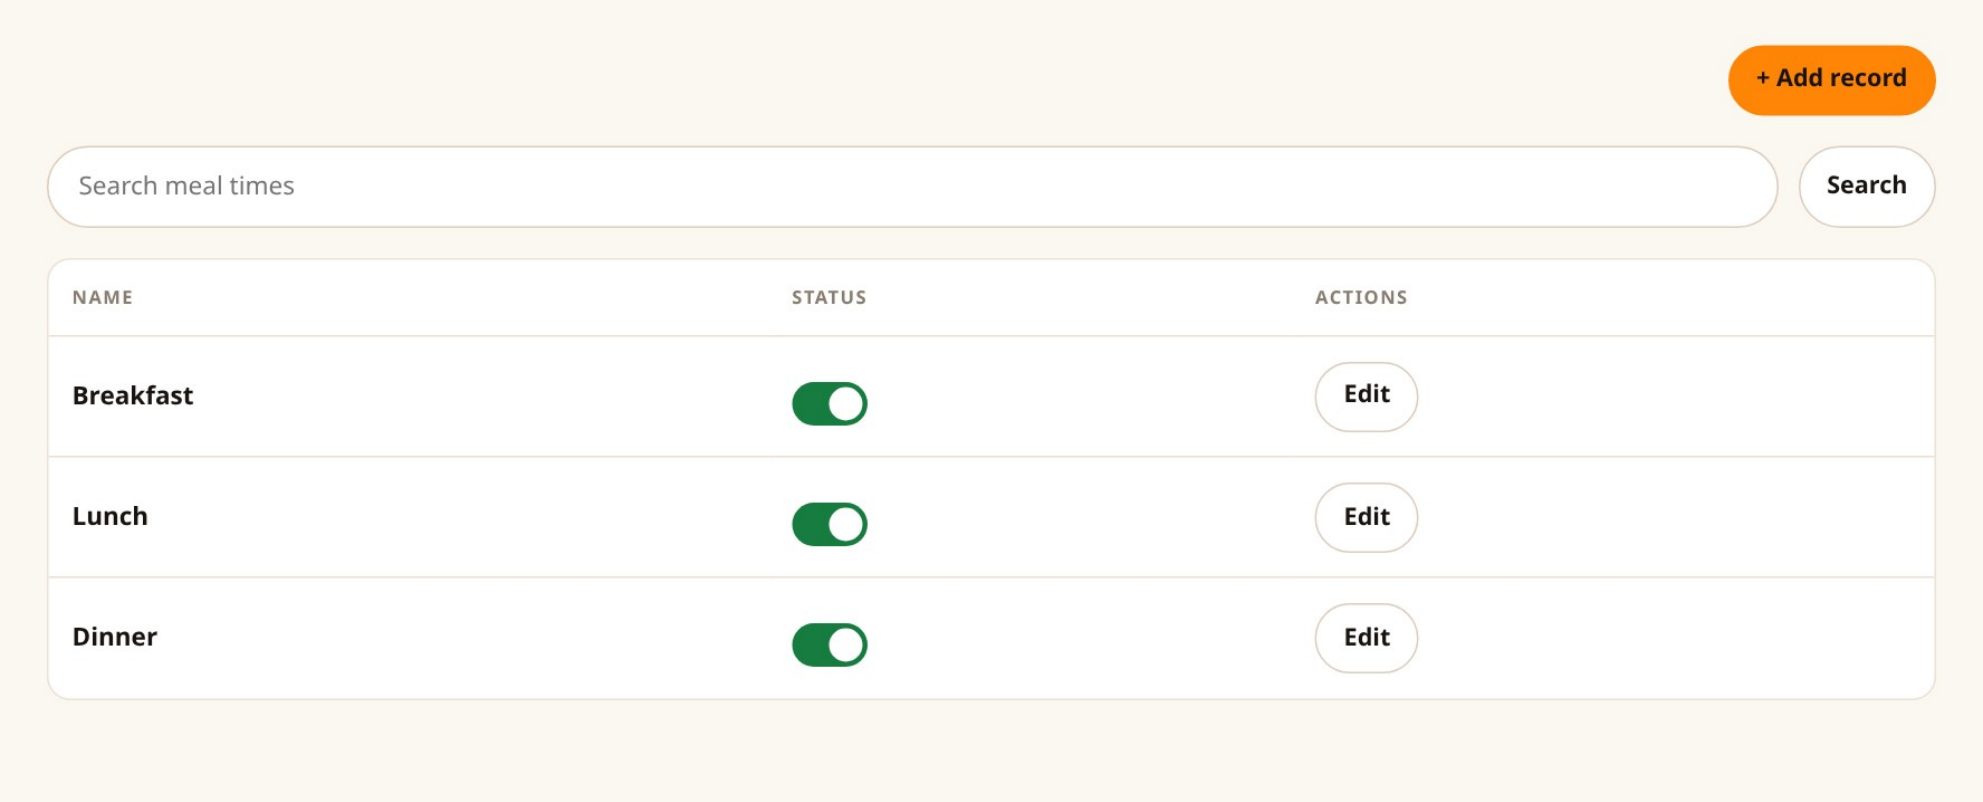

Add record — Create a new category.

Edit — Change the category name, description or photo.

Show category — Show or hide the group on the website.

Meal times

Control when customers can order each meal.

Meal — Breakfast, lunch or dinner.

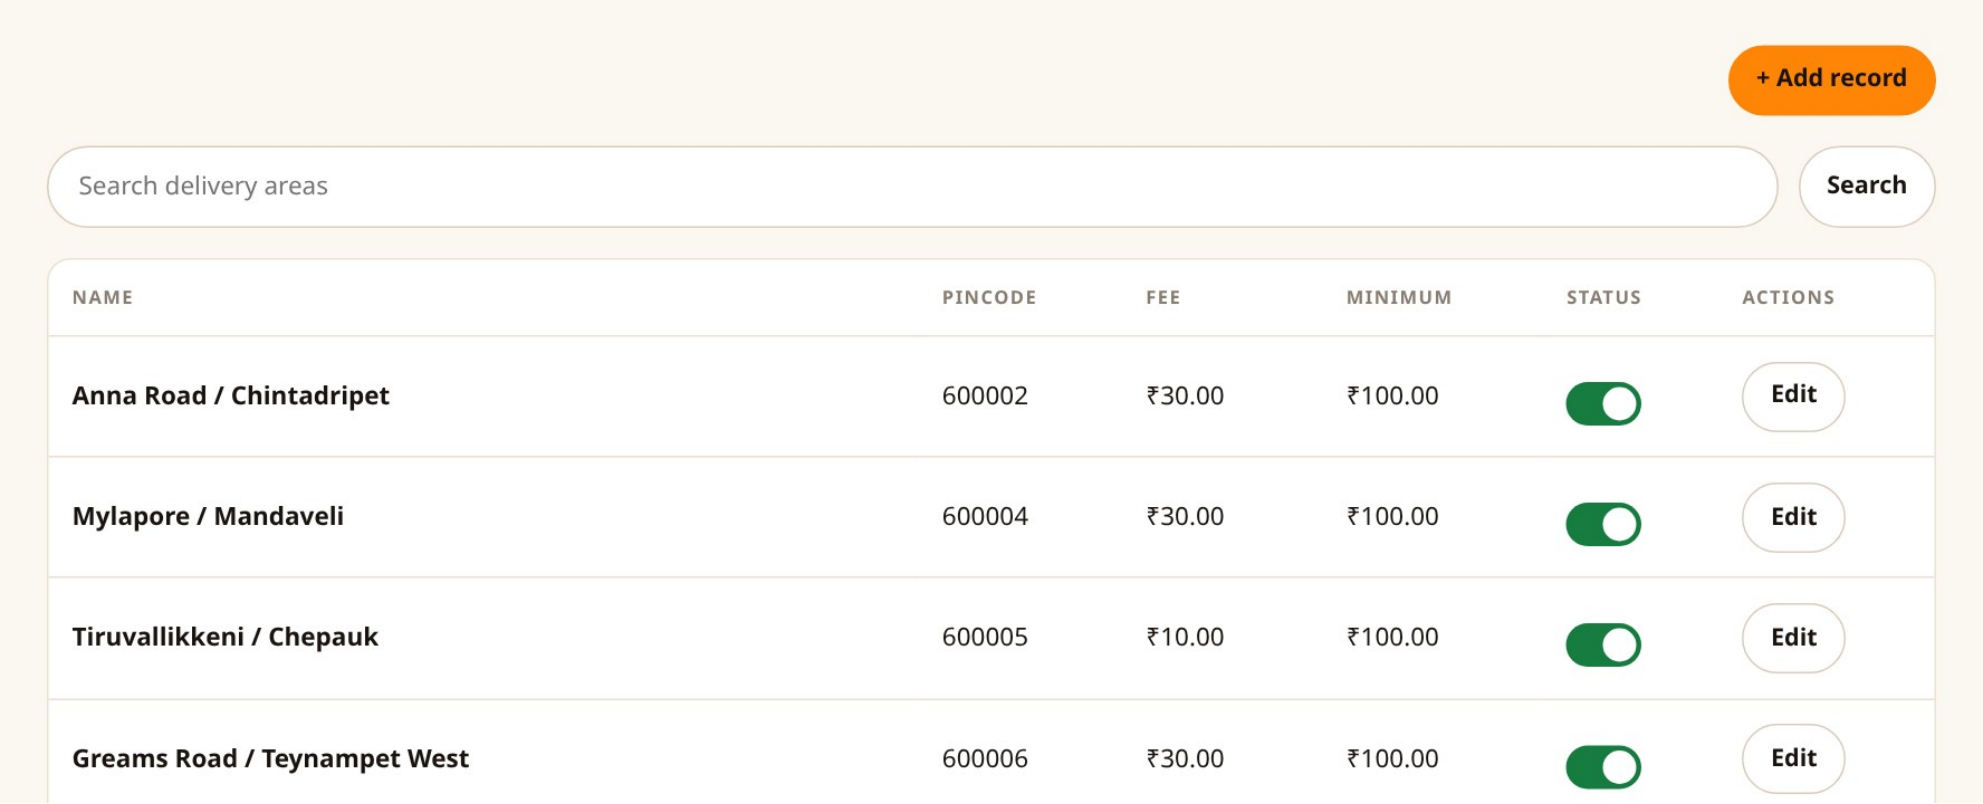

Edit — Opens the ordering cutoff and delivery-time fields.

Orders close — The last time customers can place that meal order.

Available — Enable or pause the meal time.

Delivery areas

Manage the places where meals can be delivered.

Pincode — The exact delivery pincode for that area.

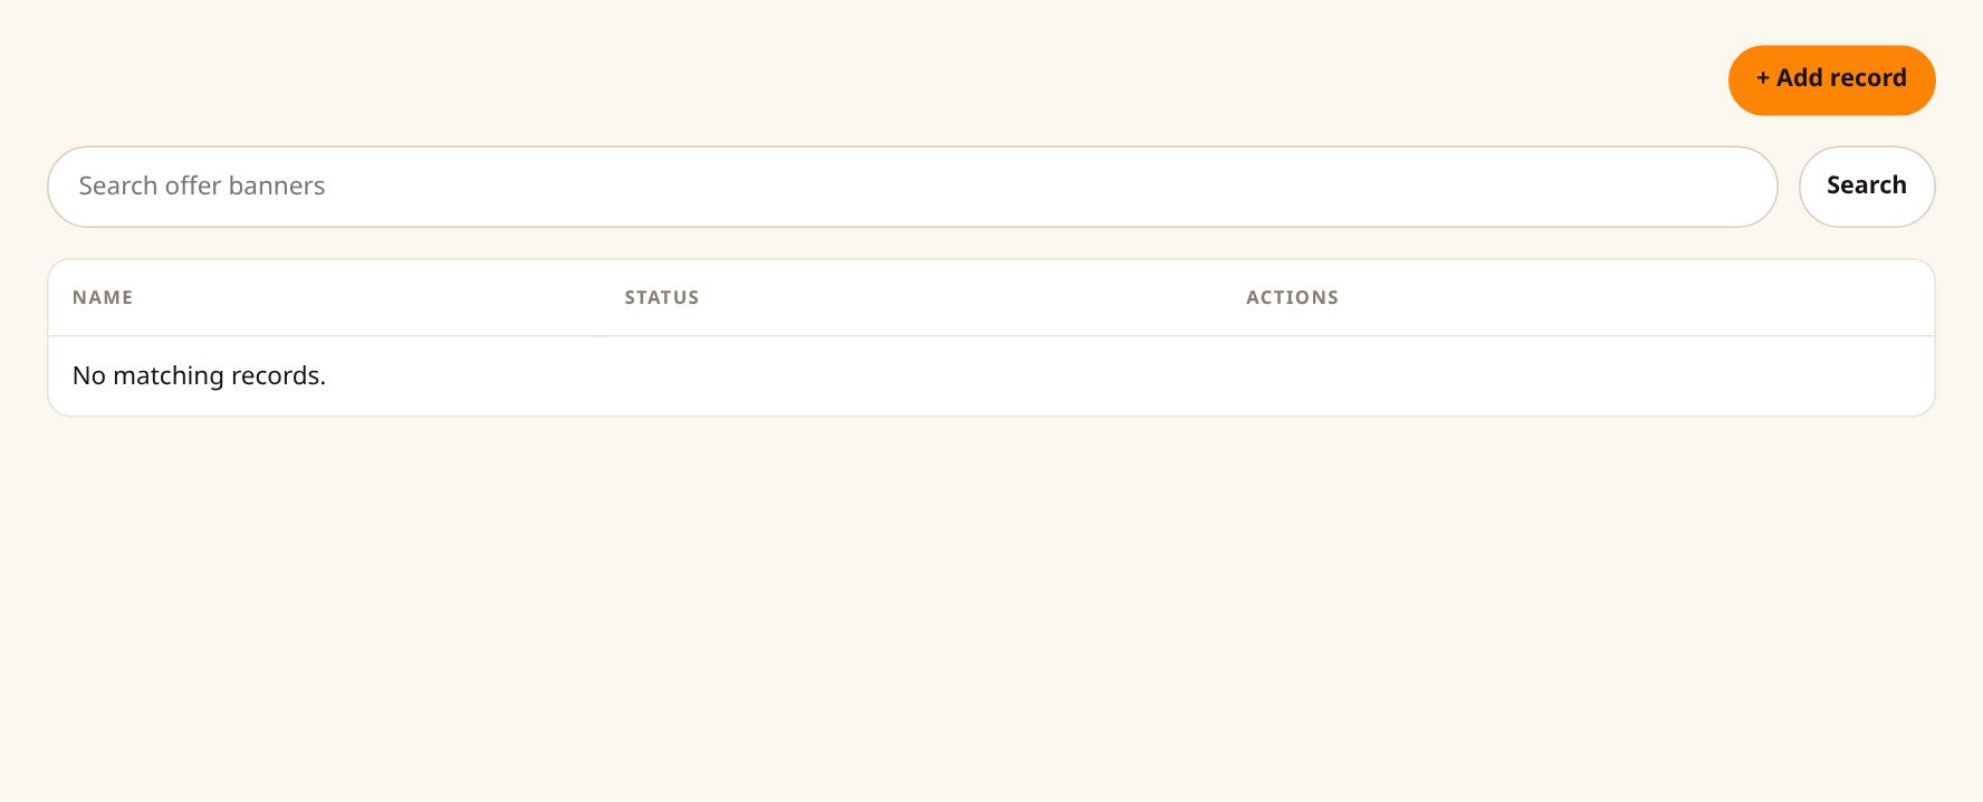

Fee — The delivery charge added to the order.

Minimum — Required food value before the delivery fee.

Delivering — Turn the area on or off; use Edit to change its details.

Offer banners

Show promotional pictures and messages on the home page.

Banner — An offer picture with a heading, message and optional link.

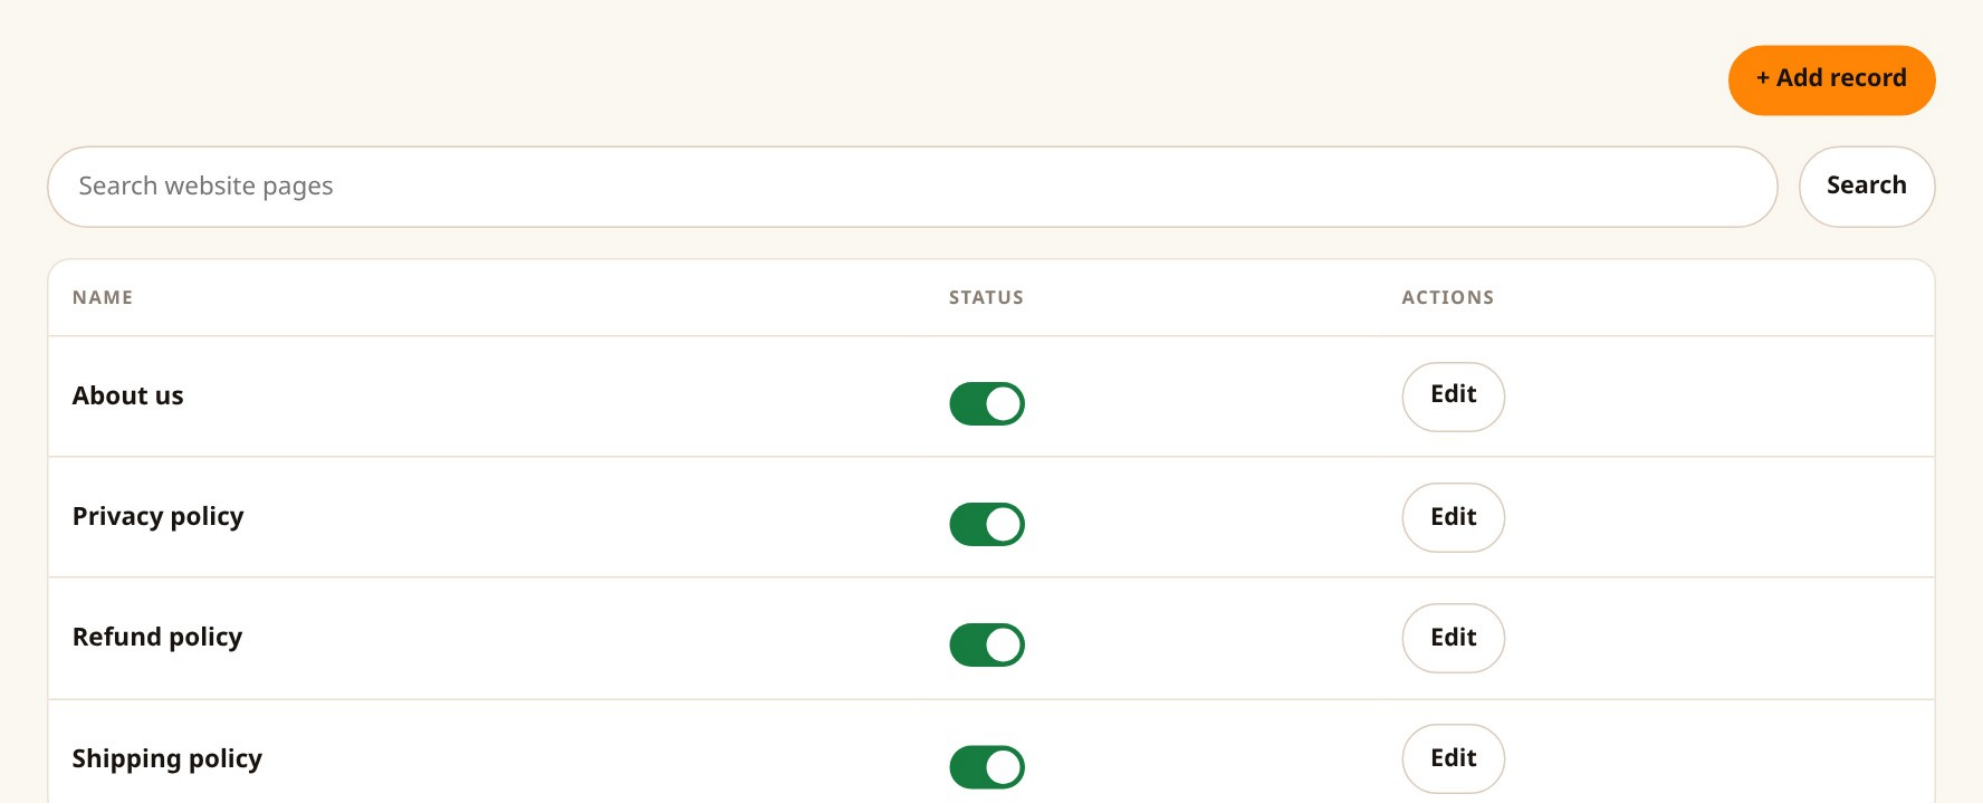

Add record — Create a new promotional banner.

Edit — Change the offer text, picture or link.

Show banner — Show or hide the promotion.

Website pages

Manage About us, policies and other information pages.

Pages — The information customers can read on your website.

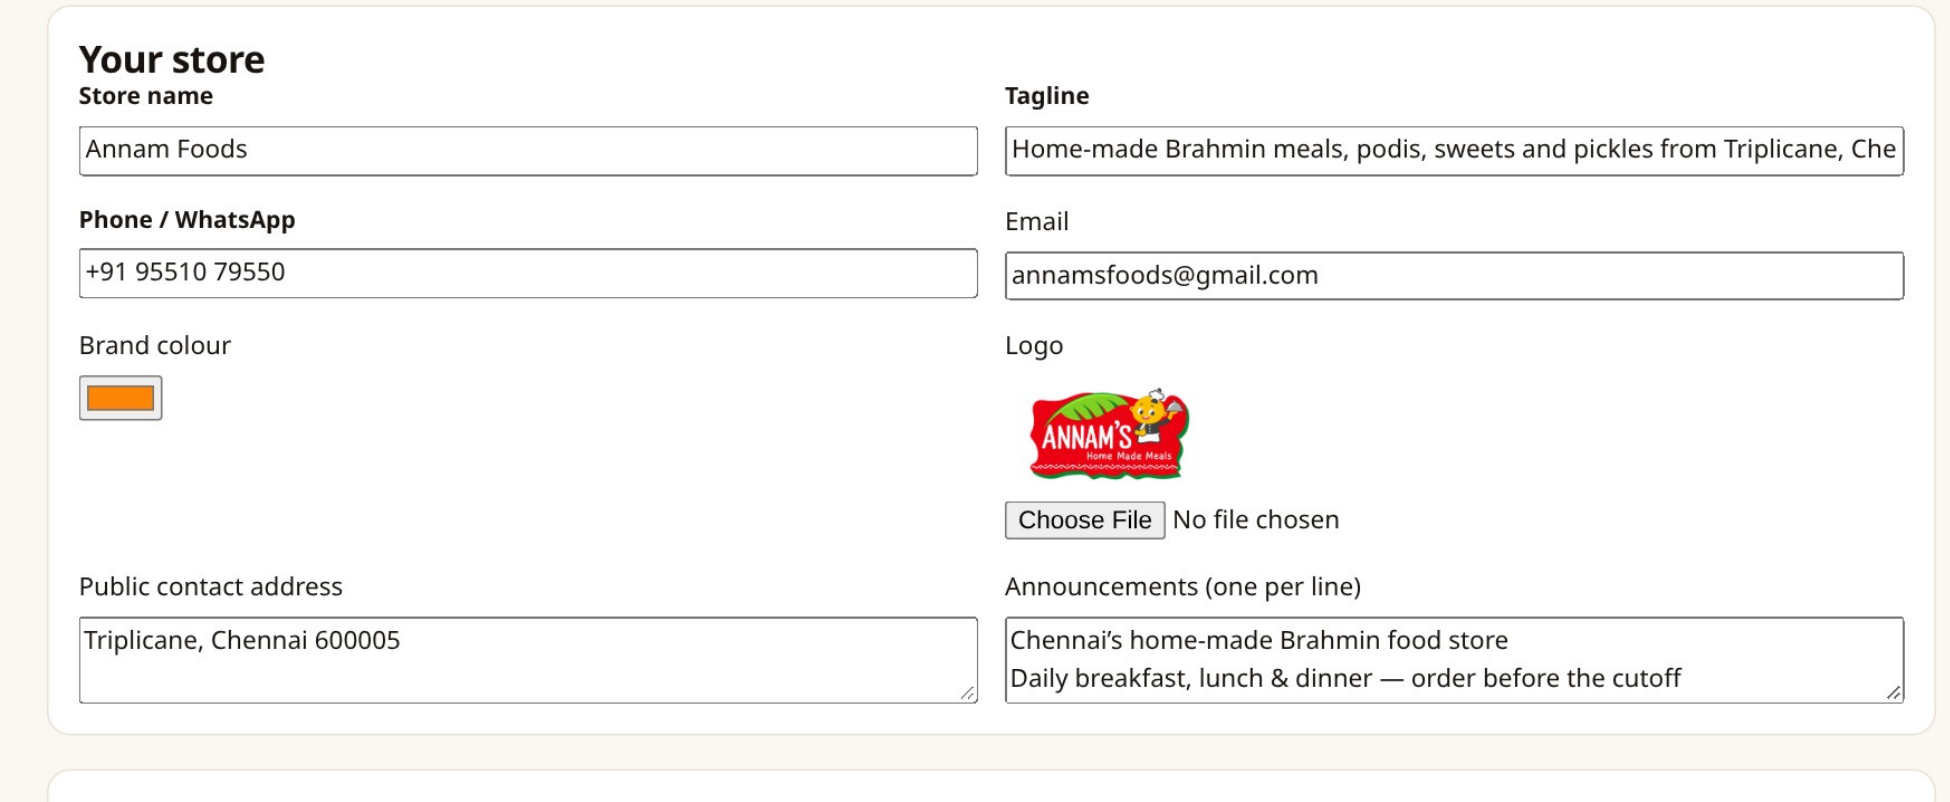

Add record — Create a new information page.

Edit — Change the title and page content.

Published — Controls whether customers can open the page.

Store settings

Update the basic details customers see about your business.

Contact details — Store name, phone, email and public address.

Branding — Your website logo and brand colour.

Announcements — Short messages shown on the website.

Save settings — Applies the details you have changed.
